The Vang Danh Coal Processing Plant is located approximately 20 statute miles NNE of Haiphong. 1/ It is connected by rail to a port facility a few miles south of Uong Bi. Electric power is apparently supplied by a thermal powerplant in Uong Bi, although there is a small possible power or steam-plant in the Vang Danh plant. During the past 7 months the plant has been rebuilt and expanded. New facilities include access roads, tramways or conveyor systems, a settling basin, some housing, and warehouses. A large overhead tramway was under construction in [REDACTED]. The mines or tramways NW of the plant appear to be new. The principal components in the plant have been annotated on the photography.
